Office Action Summary

Application No.

10/624,413

Applicant(s)

LONG, ROBERT T.

Examiner

Christy M Green

Art Unit

3635

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 03 January 2005.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-7 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-7 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☒ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 22 July 2003 is/are: a) ☐ accepted or b) ☒ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

This is a second office action for serial number 10/624413, entitled Concrete sandwich wall panels and a connector system for use therein, filed on July 22, 2003.

Response to Amendment

In response to the examiner's office action mailed 9/28/04, the applicant has amended the drawings, claim 1 and added claim 7.

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the over-molded component of claims 1 and 7 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New

Art Unit: 3635

Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: the term, "over-molded component" of claims 1 and 7 is unclear as to what exactly the component of the structure is supposed to be, is it the ears, the washer, or both. Since this limitation was not specifically delineated in the drawings, nor is it clearly defined within the disclosure, the examiner will interpret this limitation as best understood until further clarification is made to the application.

Also, within the disclosure on page 5, line 17, the last word in the sentence appears to be misspelled, it seems as if it should be "been". If so, appropriate correction should be made.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 stand rejected under 35 U.S.C. 102(b) as being anticipated by Long ('574).

Art Unit: 3635

Long discloses the claimed invention a connector element (20) comprising a fiber composite shaft (26 – column 4, lines 27-28) with at least one over-molded component (interpreted as in attached figure 2) comprising anchorage ends (30 and 40 – figures 2 and 9) and one or more locating flanges (42); anchorage ends (30,40) provide bi-directional force transfer between (by column 1, lines 56-61) the connector body (at 20) and surrounding concrete (12 and 14); snap features (near edge of 30 and 28 in figures 9); and a pointed end (32).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Long ('574).

Long discloses the claimed invention as stated above in claim 1, except for the over-molded component is made from a polymer. Long does however state in column 1, lines 52-55, that the connector is made of plastic or other high R material, therefore It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the connector of Long to be made from a polymer, since he teaches that it is known in the art to provide a connector with an over-molded component of polymer or plastic and other high R materials, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of

Art Unit: 3635

its suitability for the intended use as a matter of obvious design choice. Also, it is common knowledge to those of ordinary skill to choose materials that has sufficient strength for the intended use of that material.

Response to Arguments

Applicant's arguments filed 1/3/05 have been fully considered but they are not persuasive.

Regarding the applicants argument that the Long reference does not describe a connector with one or more over-molded components, the examiner recognizes the argument, however, the examiner has incorporated an attached figure as stated within the rejection above to address the added limitation an over-molded component, also, since the applicant was not clear within the disclosure or within the drawings as to what exactly this limitations is referring to or is in particular to the structure itself, the examiner has made the interpretation of this limitation as best understood. Also, it is noted that the features upon which applicant relies (i.e., one or more over-molded component) are not recited in the rejected claim(s). The claim states at least one over-molded component comprising anchorage ends and *one or more locating flanges*. Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Conclusion

Art Unit: 3635

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christy M Green whose telephone number is 703-308-9693. The examiner can normally be reached on M-F 8:00-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carl Friedman can be reached on 703-308-0839. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
